BUILDERS READY

Investment Opportunity

The app that runs the whole building job, from the first quote to the final payment, plus a built-in marketplace that brings trades the work.

Oddie Mehraj
Founder, Builders Ready

Raising £50,000 for 20%

THE PROBLEM

Building work runs on chaos — on both sides

For the builder

Quoting at 9pm, chasing invoices, WhatsApp threads, and disputes over who agreed to what. The admin eats the evenings and the margin.

For the homeowner

No easy way to find a trustworthy trade, no visibility once work starts, and the fear of paying a deposit to a cowboy who disappears.

The tools today

Job-management apps ignore the client. Lead sites just sell leads. Nobody joins the whole job up.

£140bn+ of UK building work a year still runs on texts, paper and trust.

THE SOLUTION

One app for the whole job — and the work to fill it

1

Quote

Build the quote on site. Client accepts and signs on their phone.

2

Build

Live timeline, photos from site, and every change signed off — no disputes.

3

Get paid

Staged payments by card, bank or cash, straight to the builder.

4

Win work

A built-in marketplace: homeowners post jobs, trades quote — no per-lead fee.

Branded for each builder · iOS, Android & web · built and live today

THE PRODUCT

Not a concept — a finished product, shipping now

On-site quoting

Cost + margin, branded PDF, e-signature, won quote to project in one tap.

Signed decisions & variations

Every change priced and signed. The dispute killer.

Staged payments & retention

Deposit, stages, completion, retention to snagging — paid in-app.

Live client portal

Timeline and site photos the client sees in seconds, under your brand.

Costs, margin & handover

Live margin only the builder sees; one-tap handover PDF.

Two-sided marketplace

Homeowners post, trades quote, two-way reviews.

WHERE WE ARE

Early, but real — and growing every day

9

Paying subscribers

Live, paying trades — not a waitlist

~1 / day

New sign-ups

Steady growth since we started on TikTok

100%

Feature-complete core

Quote to build to paid, end to end

The product is built and paid for

Every pound raised now goes into getting it in front of trades, not into building it. The hardest part is done. What we have not yet done is tell anyone, at scale — and since starting on TikTok, that has begun to change.

THE MARKET

Construction is the UK's biggest small-business sector

885,000

UK construction SME businesses

~78%

are sole traders (0 employees)

99%

of the sector are small businesses

The wedge

Hundreds of thousands of small UK trades still run on texts and paper. Capturing a fraction is a large business: 1,500 paying subscribers at our pricing is roughly £0.8m–£1m of annual recurring revenue — and the marketplace adds a second, scalable revenue line on top.

COMPETITIVE LANDSCAPE

The only one that joins up software, payments & leads

	Builders Ready	Tradify / Fergus	Powered Now	Checkatrade
Client portal & signed decisions	✓ Yes	—	Partial	—
Staged payments + retention	✓ Yes	Partial	Partial	—
Lead marketplace included	✓ Yes	—	—	Leads only
Job management	✓ Yes	✓ Yes	✓ Yes	—
Priced for teams (unlimited users)	✓ Yes	Per user	Per user	n/a

ROADMAP

Where the investment takes the product

NOW

Live

Quote to build to paid, marketplace, branded client app — all shipping.

0–6 MONTHS

Scheduling

Team diary, job assignment and dispatch — the #1 requested gap.

6–12 MONTHS

Accounting sync

Xero & QuickBooks two-way sync — removes the last reason to stay on rivals.

12 MONTHS+

Certs & compliance

Gas, electrical & RAMS certificates; MTD — unlocks regulated trades.

Scheduling and accounting sync turn "nice product" into "switch to it".

BUSINESS MODEL

Recurring revenue, priced for teams

STARTER

£29/mo

Up to 5 active projects

PRO

£69/mo

Up to 15 active projects

UNLIMITED

£149/mo

Unlimited projects

Unlimited users

Priced by jobs, not heads — a 5-person firm pays one flat price, not 5x.

Marketplace leads included

No per-lead fee — a sharp wedge against £100–£500/mo lead sites.

Second revenue line

In-app payments (flat £3) and marketplace scale beyond subscriptions.

THE NUMBERS

A simple model — low overheads, high margin

9

Paying subscribers today

~1 / day

Growth rate since TikTok

~85%+

SaaS gross margin

12-month goal: 500 subscribers — 1,500 by year two

The product is already built, so overheads stay low and new revenue is almost pure margin — every subscriber added drops close to straight to the bottom line. The raise simply buys the reach to add them faster.

SKIN IN THE GAME

I've already bet on this myself

Left a paying contract

Walked away from guaranteed income to build Builders Ready full-time.

Hundreds of hours

Taken it from a rough trial to finished, shipping software on three platforms.

Thousands of my own money

Funded the build, the tools and the infrastructure out of my own pocket.

A roadmap, not a finish line

Scheduling, accounting sync and compliance already mapped and costed.

This isn't a side project. It's the thing I've gone all in on.

USE OF FUNDS

Every pound goes into growth, not build

Google & paid search

Targeted ads to put Builders Ready in front of trades actively looking for a better way to run jobs.

Creator promotions

Paid partnerships with large-following construction names — trusted voices, straight to the right audience.

Expos & events

Homeowner and construction trade shows — face to face, where trust is won and sign-ups happen.

The product is finished. Every pound of the £50k goes into distribution.

THE OFFER

£50,000 for 20% of Builders Ready

WHAT YOU GET

- 20% equity in a finished, revenue-generating SaaS
- A hands-on seat, not a silent stake
- A 20% share of the profits as it scales
- A share in every bit of the upside from here

POTENTIAL RETURN ON EXIT

Conservative — £1.5m valuation

your 20% · a 6x return

£300,000

Target — £3m valuation (1,500+ subs)

your 20% · a 12x return

£600,000

Your 20% shares in the profits and any exit.

Returns are illustrative, based on target valuations if growth milestones are met — not guaranteed. Final structure to be agreed with the investor.

MORE THAN MONEY

I'm looking for a partner, not just a cheque

Ideas & direction

Someone to pressure-test decisions with and help steer the growth push.

Your network

Warm introductions — to trades, partners, suppliers and press.

On the ground

Joining me at homeowner and construction expos to open doors.

Shared belief

Someone who sees the upside of a lean, high-margin SaaS and wants in early.

The right partner makes the £50k worth far more than £50k.

THE ASK

Back the distribution of a finished product

The hard part is done and paying customers are on it. £50k lights the marketing engine — ads, creators and expos. You take 20% — a share of the profits and any exit — plus a hands-on seat for the ride.
